I agree that pictures, audios and videos recorded during the activity managed with InSilicoTrials Technologies S.p.A. may be used free of charge and for an unlimited period by InSilicoTrials Technologies S.p.A. and authorised partners (e.g. resellers, advertising agencies), partially and wholly for the promotion of its services and for PR. This includes distribution and public display on the Internet (website/social media), in internal/external digital media (offline, e.g. presentations), distribution to the press and other media, in printed advertising materials in order to promote the company and achieve better customer loyalty.

The content can be also repurposed: for example, InSilicoTrials Technologies can derive a blog, a quote or an article from a video or from an interview, or use part of the footage in a video.

List here any limitation in use – no, as long as it is according to description above

List here any acknowledgement that must go with the material: Acknowledgement to Sano Centre for Computational Science, Krakow, Poland (<https://sano.science/>).

As far as my photo contains references to my ethnic origin, religion or health (skin color, head scarf, glasses), my consent also refers to this information. The legal basis for the processing of personal data is your consent according to Art. 6 paragraph 1 letter a) GDPR. This consent is voluntary. This consent is subject exclusively to the Italian law. The responsible body for data processing is InSilicoTrials Technologies S.p.A., which is obliged to meet the requirements of the GDPR. You can reach it under InSilicoTrials Technologies S.p.A., Via Flavia 23, Trieste – Italy e-mail: marketing@insilicotrials.com

You can find a detailed explanation of your rights of data subjects at <https://insilicotrials.com/privacy-and-cookies/>

I have taken note that information on the Internet is accessible worldwide, therefore a further use of these photos videos and written documents by third parties cannot be excluded as they can be found with search engines and linked to other information. They can be copied and further processed. This can lead to the fact that information published on the Internet can still be found on the original site even after deletion.
