

## NEWS ANNOUNCEMENT - FOR IMMEDIATE RELEASE

April 27th, 2023  
Milan, Italy

# CD Pharma and InSilicoTrials join forces to enhance patient care through in silico technology

**CD Pharma**, an Italian consultancy firm in Healthcare, and **InSilicoTrials**, a leading provider of artificial intelligence (AI) and simulation tools for drug and medical device development, announced today a collaboration agreement to advance drug development through innovative *in silico solutions*.

Under this agreement, InSilicoTrials will provide its advanced *Modeling and Simulation (M&S)* technology to the partners within CD Pharma's network, enabling them to optimize their R&D process and improve their drug development timelines.

CD Pharma Group leverages new technologies and innovative methodologies to successfully develop clinical trials for its clients.

As healthcare continues to evolve, *in silico medicine* is emerging as a game-changing approach to patient care. And that's precisely where the collaboration with InSilicoTrials comes into play, providing a wide range of *computational models* for different therapeutic areas, aimed at helping pharma companies to streamline drug development cycle and bring much-needed treatments to patients faster.

"We are excited to collaborate with InSilicoTrials and leverage their in silico technology for the benefit of our network of clients" said Fabio Giordano, CEO of CD Pharma. Luca Emili, InSilicoTrials' CEO added: "We are delighted to partner with CD Pharma and support their mission to improve patient outcomes by accelerating drug development."

InSilicoTrials' computational models are designed to simulate drug development processes, enabling companies to test the *efficacy and safety of drugs in a virtual environment*. This approach has been shown to reduce the time and costs associated with drug development, making it an attractive option for pharmaceutical companies looking to optimize their R&D processes.

## [CD Pharma](#)

CD Pharma was founded in 2006 as a Consultancy firm focused on clinical trials and the development of strategic projects for pharmaceutical, biomedical and healthcare companies. **The Clinical Research Organization (CRO) Unit** has 15 years of experience in conducting interventional and observational trials as well as pathology registries.

CD Pharma supports its clients in all phases of clinical trials from study design and protocol writing to data collection, verification and cleaning, statistical analysis and report writing.

The CRO also supports **innovative clinical trials** including digital therapeutics and insilico trials. The company guarantees a high level of operating standards thanks to our emphasis on processes and digitalization and is compliant with ICH/GCP/ISO 14155 guidelines, applicable regulations and SOPs.

**The Consultancy Unit** is specialised in the production of scientific publications, expert and consensus papers development through different methodologies including patient journeys, Consensus and Delphi conferences.

## [InSilicoTrials](#)

InSilicoTrials is a company that specializes in using **artificial intelligence (AI)** and simulations to **improve drugs and medical device development**. It uses machine learning techniques to analyze large amounts of data and make predictions about the safety and efficacy of potential drug compounds and medical devices.

InSilicoTrials' goal is to help pharmaceutical, medtech companies and researchers develop new drugs more efficiently and at a lower cost by reducing the need for traditional, time-consuming, and expensive clinical trials. With its **cloud-based platform** offering advanced M&S tools to perform in silico trials analyses, InSilicoTrials supports companies to integrate AI and simulation technology into their drug development workflows.

InSilicoTrials is currently working on four projects funded by the European Commission: [In Silico World](#), [SimCardioTest](#), [Brainteaser](#) & [Disc4All](#).
